## 6 Course Description

### **BA Art & Design**

Our BA (Hons) Art and Design course is a highly flexible interdisciplinary programme of study that encourages you to identify your own individual practices, apply them to a range of real world contexts and facilitate creative responses to a range of issues.

After an initial diagnostic period, critical approaches and design methodologies will help your personal development through external facing 'live' projects, collaborative working with both university and other professional organisations, diverse workshop facilities, and a team of academic and technical staff.

#### What's covered in the course?

This degree covers interdisciplinary approaches to practice in contemporary art, design and craft.

You will work on studio, live and collaborative projects to develop your own independent practice, whether your interest lies in photography, installation, print, digital media, sculpture, illustration, curatorial practice, textiles, drawing, sound, graphic design, public art or three-dimensional design. Working closely with academic and technical staff, you will develop new skills and approaches to projects which help you gain confidence, helping you to uncover your own strengths and interests.

At all levels, contemporary and historical contexts modules are clearly aligned with core practical modules to develop the integration of theory and practice and develop the way critical studies are embedded within the programme.

Students' personal development is enhanced by regular talks and workshops from visiting experts from a range of backgrounds – such as artists, designers, curators, craftspeople, entrepreneurs, educators and project managers alongside representatives from regional and national support agencies for the creative industries. You'll also receive the support of expert academics, like Stuart Whipps, who has recently exhibited his work in the British Art Show.

Students are all also required to engage in an experiential placement in the second year of the programme to develop an understanding their potential role within the relevant professional sector. This provides an opportunity for students to develop a post-graduation roadmap

including a visualisation of their ideal future, analysis of their personal capital, barriers and values and a development timeline to identify future aims and objectives.

Students have previously enjoyed experiences, like responding to the architecture of Dudley Zoological Gardens' World Heritage Site and in particular the Zoo's 1930s-listed animal enclosures.

Our graduates have recently showcased their work at Birmingham Museum and Art Gallery, MK Gallery, and also presented a collection of design ideas to Associated Architects, earning a £5,000 prize to further present their work in the West Midlands.

#### 13 Overall Student Workload and Balance of Assessment

Overall student *workload* consists of class contact hours, independent learning and assessment activity, with each credit taken equating to a total study time of around 10 hours. While actual contact hours may depend on the optional modules selected, the following information gives an indication of how much time students will need to allocate to different activities at each level of the course.

- Scheduled Learning includes lectures, practical classes and workshops, contact time specified in timetable
- *Directed Learning* includes placements, work-based learning, external visits, on-line activity, Graduate+, peer learning
- Private Study includes preparation for exams

The *balance of assessment* by mode of assessment (e.g. coursework, exam and in-person) depends to some extent on the optional modules chosen by students. The approximate percentage of the course assessed by coursework, exam and in-person is shown below.

#### Level 3

### **Workload**
