6 Course Description

How media is made, who makes it, how it is consumed and whose interests it serves are the key questions you will explore in this degree in Media and Communication. These questions have big implications for which stories and voices are prioritised and which are neglected in the world we live in. Within a media landscape that is constantly changing, and where we can access media everywhere, these questions become particularly important for those who want to understand the media and those who would like to work in the media. The transferable, critical and technical skills learnt on the course prepare students for post-graduate study, work in the media industry and in many other sectors.

You will be given the space and freedom to explore and develop your own research and professional interests which will allow you to develop confidence and a clear focus for your next steps. You will learn about how the media industries construct and depict stories and the impact this has on our understanding of media production practices, representation, identity and culture. You will understand how audiences come to those stories, how they understand them and why.

Alongside these critical skills, you will also develop technical skills across a broad range of media forms, such as television, radio, photography and digital. We don't want you to learn these skills in isolation from each other. Rather, we invite you to combine research and production skills to use your own media content creation to explore those issues creatively. Through your work you will address current societal issues, emergent media forms and platforms, and think about the history, present and future of the media industry.

This course equips students to explore and challenge intersections, to ask and answer questions about why the media is the way it is and to have the confidence and ambition to experiment with media forms to create innovative and responsible media texts which speak to diverse audiences.

About foundation courses

This four-year programme has been specifically designed to allow students who do not initially meet the entry requirements for a three-year degree, to undertake additional level 3 study designed to ensure they are successful on their chosen degree programme.

After successful completion of your foundation year, you will have the flexibility to switch (should you wish to change direction) onto several related undergraduate Media degree programmes.

14 Course Learning, Teaching and Assessment Strategy

All of our taught courses align with our Learning, Teaching and Assessment strategy. This ensures that the teaching on your course will be shaped by the expertise in research and practice of our academic staff. The relationship between research and teaching ensures we can offer a curriculum that incorporates advances in research, emphasises the processes for producing knowledge and adopts an inquiry-based approach, designed to encourage new ideas and experimentation. Our strategy also ensures that the curriculum on your course will be designed and delivered inclusively. Our inclusive approach to curriculum and pedagogy reflects the wide range of contemporary issues which are of concern to our diverse student and staff population. This results in a curriculum which positively engages with and is willing to address and discuss issues of social justice and equality. Our approach is aimed at supporting the building of academic communities of practice and fostering high levels of scholarly professionalism in our students. All courses embed distinctive graduate attributes relevant to the subject and we hope that you will find your course engaging, challenging, stimulating and fun.

How you will learn:

Your learning will be through a mixture of lectures, practical workshops and seminars. Your course also provides an opportunity to undertake work-based learning through a placement. We embed flexible opportunities for you to access your curriculum including recorded lectures, blended

learning, on-campus delivery and intensive delivery of some modules. We recognise that students progress to higher education from a variety of educational experiences and that university is a completely new educational environment for most of you. For that reason, you will find that in your first year with us there is a focus on supporting your transition which places an emphasis on developing both the confidence and the competencies required for being successful at your university assignments. Where appropriate, we will bring in external speakers or arrange visits relevant to your specialism. These may be from industry or be focused on a particular specialist academic interest. We have excellent links with industry, community and scholarly partners which we draw on to enhance your learning experience.

How you will be assessed:

All our assessments are designed to ensure that you meet the learning outcomes of your modules and thus of the course overall. Assessment types may include written research reports, essays, case studies, practical work, portfolios and presentations. There are no formal examinations on your course, but short classroom tests may be included within an element of assessment. You will be assessed as an individual but there may be times when you will be asked to work within teams and submit assessments as groups. All modules offer chances for formative assessment, that is, informal assessments that are used to assess your understanding before the final submission of your work. Formative assessments also help inform the teaching strategy within a module, identifying areas where we can offer extra help and guidance. We will offer tutorials and a chance for you to discuss your draft assessments before you submit them. Once marked, we will give formal feedback and 'feed forward' on all work submitted, aimed at helping you improve future submissions.

What we expect of you:

Your course is designed so that you experience learning through inquiry: questioning, investigating, examining, exploring, analysing and creating. By engaging fully with your studies and taking up the support we offer you, you will gain the confidence and skills you need to be successful in your studies. As you progress through your course, we will increasingly expect you to study independently. In your final year you will undertake a major project for which you will receive supervision, but we will expect you to organise your learning and undertake independent research. By the end of the course, as a result of your full engagement with your studies, you will be able to begin the next stage of your life as a confident, resilient and socially aware person.

16 Overall Student Workload and Balance of Assessment

Overall student *workload* consists of class contact hours, independent learning and assessment activity, with each credit taken equating to a total study time of around 10 hours. While actual contact hours may depend on the optional modules selected, the following information gives an indication of how much time students will need to allocate to different activities at each level of the course.

- Scheduled Learning includes lectures, practical classes and workshops, contact time specified in timetable
- *Directed Learning* includes placements, work-based learning, external visits, on-line activity, Graduate+, peer learning
- Private Study includes preparation for exams

The *balance of assessment* by mode of assessment (e.g. coursework, exam and in-person) depends to some extent on the optional modules chosen by students. The approximate percentage of the course assessed by coursework, exam and in-person is shown below.
