ENTRY REQUIREMENTS

- A Degree in Higher Education or equivalent.

or

- Evidence of appropriate study at Level 6 with relevant experience, which we'll ask you to demonstrate by presenting a portfolio of your work.

COURSE OVERVIEW

The Postgraduate Certificate in Haematology and Cancer Care offers the opportunity for qualified practitioners involved in this specialist area to enhance their knowledge, skills and expertise.

All programmes offer a convenient part-time format to fit around home and work commitments.

COURSE CONTENT

The course consists of four modules. Three core modules:

- Fundamentals of Malignant Conditions
- Therapeutic Interventions in Haematology
- Management of Adults with Cancer

This course provides the opportunity for undergraduate and graduate level students to develop your professional and academic abilities in the field of haematology and cancer care. It will encourage you to think independently and creatively, and integrate theory and practice in your specialist field.

The course design is flexible to enable practitioners to plan a programme of study that will meet professional and personal learning needs.

Plus one other relevant optional module from the Dimensions in Healthcare Framework in negotiation with the pathway leader.

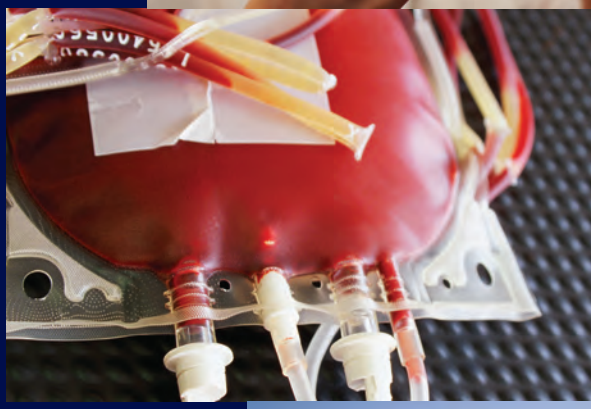

Each module is 150 hours of study time made up of 30 timetabled hours and 120 hours of private study.

You can choose to study the whole degree, or you can simply pick modules that suit your needs and the needs of your organisation.

ASSESSMENT

Modules will be assessed by a range of different methods but there will be no written examinations.

FURTHER STUDY

For students who wish to continue studying a Master's degree there are a range options available. For further information contact the Personal Development Department **0121 331 6162** or **tracey.cutler@bcu.ac.uk**

EMPLOYABILITY

This course provides the opportunity for graduate level students to develop their professional and academic abilities in the field of haematology and cancer care. It will encourage you to think independently and creatively, and integrate theory and practice in your specialist field.
