SUPPORTING YOU TO SHAPE THE FUTURE

Birmingham City University

MA LANDSCAPE ARCHITECTURE AT BIRMINGHAM SCHOOL OF ARCHITECTURE AND DESIGN IS ONE OF THE MOST INNOVATIVE AND FORWARD THINKING IN THE UK

At the heart of this MA are the design studios with ambitious projects that respond to current global issues and real-life scenarios. These relate to communities, landscapes, environment, loss of biodiversity, food production, climate change, health and well-being and large infrastructure projects. You will be challenged to participate in these dialogues and in presenting creative, sustainable and resilient design solutions.

Our links to practices and our Collaborative Laboratory (Co.LAB) partners offer an opportunity to be involved in the complex nature and the challenges of being a landscape architect in the real world. You'll get chance to collaborate with local stakeholders, institutions and colleagues across the University, including projects that facilitate Landscape Institute policy.

If you do not hold a landscape architecture degree, or if you do not meet the minimum entry requirements, you can undertake the option of our two-year MA Landscape Architecture.
