1. Introduction

This guide provides a concise definition of the different forms of reference used in the BCU Harvard Referencing standard. It is not completely comprehensive and for most cases only provides a single example of each form of reference.

The full guide is available as a pdf from http://www.bcu.ac.uk/library/services-and-support/referencing which contains additional information, including advice on citing and style guidelines.

This guide uses a visual format to define the different forms of reference with a consistent use of colours. Most of the textual elements of this format are self-explanatory or can be worked out from the examples provided. In brief:

- A slash, /, means “or” and separates alternatives.

- Some additional remarks, such as (optional) and (if not first), are given in round brackets.

- Round brackets are also sometimes used to denote alternatives, such as (Day and) Month.

- Authorship refers to a single author or multiple authors or an institutional author.
