Birmingham City University

Submitted to:

Japan's Universal Periodic Review
Fourth Cycle
42nd Session of the UPR Working Group
Jan – Feb 2023

About the UPR Project at BCU:

Birmingham City University's Centre for Human Rights was created in 2014 to promote human rights, ensure access to justice, and enhance the rule of law around the world. We seek to achieve this through leading research, education, and consultancy. We submit expert reports to international human rights regions, provide advisory services to governments and nongovernmental organisations, and draft legal opinions and file legal briefs in domestic courts and international human rights courts.

The Centre for Human Rights established the UPR Project in 2018 as part of our consultancy service. We engage with the Human Rights Council's review process in offering support to the UPR Pre-sessions, providing capacity building for UPR stakeholders and National Human Rights Institutions, and the filing of stakeholder reports in selected sessions. The UPR Project is designed to help meet the challenges facing the safeguarding of human rights around the world, and to help ensure that UPR recommendations are translated into domestic legal change in member state parliaments. We fully support the UPR ethos of encouraging the sharing of best practice globally to protect everyone's human rights. The UPR Project at BCU engages with the UPR regularly as a stakeholder and is frequently cited by the OHCHR. You can read more about the UPR Project here: www.bcu.ac.uk/law/research/centre-for-human-rights/projects-and-consultancy/upr-project-at-bcu

INTRODUCTION

1. Japan is party to eight of the nine core international human rights treaties, for which it should be commended.¹ This includes the International Covenant on Civil and Political Rights (ICCPR) and, in line with the ICCPR's protection of the right to life and the prohibition against inhuman punishment, this Stakeholder Report focuses upon capital punishment.
2. We make recommendations to the Government of Japan on this key issue, implementation of which would also see Japan moving towards achieving Sustainable Development Goal 16 which aims for peaceful and inclusive societies, access to justice for all and effective, accountable and inclusive institutions at all levels.
3. We urge Japan to make practical commitments in the fourth cycle of the UPR for the abolition of this punishment. As an initial step, we call for the suspension of the capital judicial process through the initiation of an official moratorium on the death penalty. This will enable the government to make a positive commitment towards domestic *de jure* abolition.

A. Japan and International Law on the Death Penalty

4. Whilst the Japanese Constitution does not explicitly provide for capital punishment, Article 31 says that “[n]o person shall be deprived of life or liberty...except according to procedure established by law.”² The Penal Code of Japan³ states that a death sentence can be handed down for multiple offences, including conduct which contravenes the evolving jurisprudence on the ‘most serious crimes’ under international law.⁴ This includes capital offences that do not result in death, including arson, causing a flood leading to damage, and detonating an explosive.⁵
5. In practice, the punishment is reserved for cases of murder,⁶ with the Supreme Court of Japan confirming in its landmark *Nagayama* ruling that the death penalty should be used in “extremely heinous cases.”⁷ Executions are carried out by hanging.⁸ Japan does not use the mandatory death penalty, which is a positive step towards the restriction and ultimate abolition of capital punishment.
6. In December 2021, Japan resumed executions after a two-year hiatus, executing three people by hanging.⁹ It was estimated that, as of 2021, there were 117 people on Japan's death row,¹⁰ with three people sentenced to death in 2021.¹¹ Up to date figures for 2022 are yet to be released at the time of submission.

International Law Promoting the Restriction and Abolition of the Death Penalty

7. The United Nations' framework for regulating the application of the death penalty comprises a corpus of international human rights law and jurisprudence. Of particular relevance are Articles 6, 7, and 14 ICCPR,¹² its Second Optional Protocol,¹³ the ECOSOC

Safeguards Guaranteeing Protection of the Rights of Those Facing the Death Penalty (ECOSOC Safeguards),¹⁴ the Secretary General’s quinquennial reporting,¹⁵ the Secretary General’s Question on the Death Penalty,¹⁶ and the Human Rights Committee’s decisions.¹⁷ Other relevant treaties include the Convention Against Torture and Other Cruel, Inhuman and Degrading Treatment or Punishment¹⁸ and the Convention on the Rights of the Child.¹⁹ Article 19 of the Constitution of Japan provides that “treaties concluded by Japan and established laws of nations shall be faithfully observed.”²⁰

8. The General Comment on the Right to Life²¹ provides an interpretive lens on the death penalty and concerning ICCPR Article 6(6), which states, ‘[n]othing in this article shall be invoked to delay or to prevent the abolition of capital punishment,’ it:

reaffirms the position that States parties that are not yet totally abolitionist should be on an irrevocable path towards complete eradication of the death penalty, de facto and de jure, in the foreseeable future. The death penalty cannot be reconciled with full respect for the right to life, and abolition of the death penalty is both desirable [...] and necessary for the enhancement of human dignity and progressive development of human rights.²²

9. Furthermore, there has been a consistent increase in state signatures solidifying a global position against this punishment as seen in the UN General Assembly’s biennial resolution to impose a global moratorium on the use of the death penalty. The eighth and most recent iteration, passed on 16 December 2020, had a total of 123 votes in favour with 38 votes against and 24 abstentions. Japan has voted against all such resolutions to date.²³
10. Conversely, Japan’s voting record is reflected in its absence as a signatory to the Joint Permanent Missions’ most recent *note verbale* of dissociation, which records a formal objection to the Secretary General of the United Nations on the attempt to create a global moratorium on the death penalty.²⁴ The absence from the note verbale provides the platform for Japan to signal its support for a global moratorium in the forthcoming resolution.

B. Implementation of Recommendations from Cycle Three in 2017

11. Japan received 217 recommendations in the Third Cycle of which 145 were accepted and 72 were noted.²⁵ A total of 23 recommendations focused on the death penalty, with another 5 focusing on prison conditions generally, yet **none of these recommendations were accepted**.²⁶ This is disappointing and we strongly urge the Government of Japan to consider accepting or partially accepting the capital punishment recommendations it receives in Cycle Four.

Recommendations concerning Japan’s Adoption of International Law

12. **Slovenia** (para 161.3), **Argentina** (para 161.4), **Montenegro, Spain, Sweden, Togo** (para 161.5), **Croatia, Germany** (para 161.6), **Mongolia** (para 161.7), **Uruguay** (para 161.8), and **Guatemala** (para 161.9) recommended that Japan should ratify the Second Optional

Protocol to the ICCPR. These were all noted, with the government stating that “each sovereign country should be allowed to make decisions on the issue of the death penalty independently.”²⁷ Japan has not indicated any change to its position.

Recommendations concerning Abolition

13. A number of States recommended a moratorium on the death penalty with a view to abolition. This included **Cyprus, Italy** (para 161.95), **Republic of Moldova** (para 161.96), **Norway, Rwanda** (para 161.97), **Bolivian Republic of Venezuela** (para 161.98), **New Zealand, France, Mexico** (para 161.99), **Iceland, Belgium, Sweden, Finland, Spain, Brazil, Netherlands, Denmark, Australia** (para 161.100), and **United Kingdom** (para 161.101). **Timor-Leste** (para 161.102), **Liechtenstein** (para 161.103), **Colombia** (para 161.104), **Paraguay, Portugal** (para 161.105) and **Panama** (para 161.106) recommended the abolition of the death penalty. Japan noted all of these recommendations and continues to support the retention of capital punishment.
14. Whilst such recommendations are welcomed, it is crucial that they remain specific and measurable in order to assess the level of implementation. Broad recommendations, whilst easy to accept, lack any impetus to bring about real change.²⁸ It is recommended that States adopt a SMART approach to recommendations as recognised by UPRinfo.²⁹ This would help Japan to initiate an incremental approach to reducing the scope of the punishment and map out the process for abolition.

Recommendations concerning Specific Aspects of Japan’s Death Penalty

15. Other recommendations were more specific, focusing on distinct issues related to Japan’s capital system. **Switzerland** (para 161.107) asked Japan to “[i]ntroduce a system of mandatory appeal” in death penalty cases, and **France** (161.108) suggested that, in order to protect the rights of those sentenced to death, Japan should guarantee the right to an appeal and suspend death sentences for those appealing for a retrial. Japan noted both recommendations, stating that “a defendant has the right to appeal and the death penalty would not be carried out until the sentence becomes final and binding,” but that it would be “inappropriate” to suspend death sentences based upon appeals for a retrial.³⁰ Japan continues to take this approach, as two of the three men executed in 2019 had pending petitions for a retrial at the time of their executions.³¹ This is a clear violation of international norms, in particular the ECOSOC Safeguards,³² and is something that should be raised by Member States in Cycle Four.
16. **Austria** (161.109) recommended that Japan should “[d]esignate an official body for a comprehensive review...to promote an informed debate on the death penalty.” Similarly, **Canada** (para 161.110) asked Japan to “engage in public debate about the future use of the death penalty.” Both recommendations were noted, with the government stating that “[t]he majority of Japanese people consider the death penalty to be unavoidable in the case of extremely heinous crimes.”³³ Whilst a 2020 poll carried out by the Japanese government found that over 80% of the 3000 people polled supported capital punishment,³⁴ the results of Andreescu’s & Hughes’ study “suggest that the public support for capital punishment in Japan is not as extensive as government-sponsored public opinion polls tend to show.”³⁵ Moreover, Muramatsu et. al.’s study confirmed that “neither death sentences nor

executions deter homicide or robbery-homicide” in Japan.³⁶ As such, opening up a wider public debate on the future of the death penalty in Japan would be beneficial, allowing a wider group of Japanese citizens to provide their opinions.

Recommendations on Prison Conditions and Solitary Confinement

17. Whilst not solely focused on the death penalty, numerous countries recommended that Japan should improve prison conditions, which includes death row. **Spain** (161.111), **Zambia** (161.113) and **Denmark** (161.115) recommended that prison conditions must be improved in line with international standards, including the United Nations’ Standard Minimum Rules for the Treatment of Prisoners (the Nelson Mandela Rules).³⁷ **Sweden** (para 161.112) and **Canada** (para 161.114) made specific points about what must be improved, with both noting the requirement for improved medical and dental care, appropriate provisions for both winter and summer temperatures, and improved nutrition.
18. Japan noted all recommendations related to prison conditions, pointing to its statement during the interactive dialogue that Japan has made “progress in improving prison conditions, including medical care and heating and cooling, and indicated that inmates sentenced to death were treated in appropriate conditions.”³⁸ Information reported about death rows across Japan discredits this, instead suggesting that the conditions on death row constitute cruel, inhuman and degrading treatment, contrary to Article 7 ICCPR and the Nelson Mandela Rules.
19. The Cornell Center on the Death Penalty Worldwide reports that those on death row in Japan are housed in “cells of about 8 square meters...[and a]ttorneys and relatives are virtually the only people who can visit or correspond” with them.³⁹ They are not allowed to watch television or listen to the radio, and their “reading material is controlled.”⁴⁰ People on death row in Japan are also kept in solitary confinement, and “[f]rom waking to the evening inspection, they may not speak, make any noise, walk around their cell or look around.”⁴¹ **Panama**’s (para 161.106) recommendation to abolish the death penalty also asked Japan to “modify the penitentiary regulations to strictly limit solitary confinement.” This is line with the UN Human Rights Committee’s recommendation to Japan in 2014, to avoid “imposing solitary confinement on death row prisoners except in the most exceptional circumstances and for strictly limited periods.”⁴²

C. Further Points for Japan to Consider

Secrecy of Capital Punishment in Japan

20. People on death row in Japan are not advised of their execution date until the morning of their execution. This is a violation of the Convention Against Torture and the prohibition of cruel, inhuman or degrading treatment as set out in Article 7 ICCPR. The secrecy surrounding the execution date also extends to the person’s family, as “[t]heir families are usually notified about the execution only after it has taken place.”⁴³ The Committee on Torture has confirmed that “refusing to provide convicted persons and family members advance notice of the date and time of the execution is a clear human rights violation,”⁴⁴

and the UN Secretary General's 2021 Report on the Question of the Death Penalty made clear that transparency within capital punishment is essential.⁴⁵

21. Multiple UN bodies have asked Japan to prohibit this practice, for example, in 2014, the UN Human Rights Committee recommended that Japan should "[e]nsure that the death row regime does not amount to cruel, inhuman or degrading treatment or punishment by giving reasonable advance notice of the scheduled date and time of execution to death row inmates and their families."⁴⁶ Such recommendations have not been implemented and, in November 2021, two of the three men facing execution sued the government, stating that this practice was "illegal" and "inhumane."⁴⁷ However, both men were executed the following month without timely notice of their execution date.
22. Japan's reasoning for continuing this practice is that, if they found out about their execution date in advance, it "would impair the emotional stability of the inmate who will be executed."⁴⁸ However, findings from "[a] survey conducted among death row inmates in December 2012 reported that a majority of prisoners wanted to be notified of their execution in advance."⁴⁹ Whilst Japan retains the death penalty, this practice must be halted and people on death row, as well as their families and legal teams, must be provided with timely notice of an execution date.

Adopting the UPR Recommendations to Enable the People of Japan to Benefit from Advances in Effective Penology

23. The right to benefit from scientific advancement should also apply to the progress in social science research on the death penalty. The Universal Declaration of Human Rights, Article 27, states, "[e]veryone has the right freely to participate in the cultural life of the community, to enjoy the arts and to share in scientific advancement and its benefits,"⁵⁰ and the ICESCR article 15 (1)(b) recognises the right of everyone, "[t]o enjoy the benefits of scientific progress and its applications."
24. Roger Hood and Carolyn Hoyle have produced the leading social science and criminological investigations into the death penalty worldwide and have concluded:

[t]hose who favour capital punishment 'in principle' have been faced with yet more convincing evidence of the abuses, discrimination, mistakes, and inhumanity that appear inevitably to accompany it in practice. Some of them have set out on the quest to find the key to a 'perfect' system in which no mistakes or injustices will occur. In our view, this quest is chimerical.⁵¹
25. Social science investigations now demonstrate that reflecting appropriate government means that whilst capital punishment could be created within a legitimate parliamentary process,⁵² it is now clear that the application of the death penalty renders an illegitimate and inhumane outcome.⁵³ Abolition in Japan would enable the people of the country to benefit from the advancement of the leading social scientific research on punishment policies.

The Universal Periodic Review Recommendations and the Contribution to the Sustainable Development Goals

26. Japan should consider accepting and implementing the UPR recommendations as an expression of mutual reinforcement of the government's commitment to promoting the Sustainable Development Goals.⁵⁴ The human rights values expressed in both the UPR and the SDGs can be woven together to promote policy coherence.⁵⁵
27. SDG 16 provides for "Strong Institutions and Access to Justice and Build Effective Institutions," but the application of the death penalty is inconsistent with this goal. Specifically, SDG 16.1 aims to reduce death rates, promote equal access to justice, and "protect fundamental freedoms," and to further this, SDG 16.A.1 identifies the importance of relevant national institutions, for building capacity at all levels, to prevent violence and combat terrorism and crime.
28. The use of the death penalty does not signal legitimate strength in institutions, but renders counterproductive and inhumane consequences, including a brutalising effect upon society. The death penalty is antithetical to strong institutional processes for the fostering of the human dignity of the people of Japan.

D. Recommendations

We recommend the Government of Japan to:

- i. Uphold and enforce its international obligations to safeguard the right to life, pursuant to Articles 6, 7 and 14 of the ICCPR.
- ii. Whilst the death penalty continues to be retained by Japan, ensure it complies with the 'most serious crimes' principle, under Article 6 ICCPR, restricting punishment to crimes of intentional killing only.
- iii. Ratify the Second Optional Protocol to the ICCPR aiming at the abolition of the death penalty.
- iv. Put in place a de facto moratorium, with a view to abolition, within the next three years.
- v. Affirm its commitment to SDG 16 on access to justice and strong institutions through its support at the next biennial vote on the UNGA Resolution on the moratorium on the use of the death penalty.
- vi. Whilst retaining the death penalty, do not execute any person who has appeals pending, including appeals for retrials, in line with ECOSOC Safeguard Number 8.
- vii. Provide the platform for a comprehensive and inclusive public debate on the future of the death penalty in Japan, allowing a group of people that is representative of all Japanese citizens to share their opinions.
- viii. Prohibit the practice of informing people on death row of their execution date on the morning of their execution. Provide those on death row, their families, and their legal teams with sufficient notice of the execution date, in line with international human rights protections, allowing appropriate appeals to be filed and adjudicated upon.
