HEALTH AND SOCIAL CARE MINI LECTURES

ALL

Routes into the Allied Health Professions

The NHS is one of the largest workforces in the world, employing over a million people. The Allied Health Professions are a group of specialist practitioners supporting healthcare in the United Kingdom and play a vital role in treating people for a range of different illnesses and disabilities.

Studying in our School of Health Sciences

Our NHS is full of amazing personnel from a wide variety of academic backgrounds. Our School of Health Sciences is a leading provider of pre-registration courses, from diagnostic radiography, to speech and language therapy and biomedical sciences. This talk highlights a number of less well known, but no less important, careers in healthcare.

CONDUCTIVE EDUCATION

Changing views on special educational needs and disabilities through conductive education

This session will challenge your students' thinking on disabilities and what children and adults with special needs can achieve. Students can explore the role of a professional conductor and discover how to best support individuals with neurological motor disorders to learn.

Session dates are negotiable. For further information or to book, please get in touch via www.bcu.ac.uk/schools-and-colleges

SPEECH AND LANGUAGE THERAPY

Studying speech and language therapy at Birmingham City University

Speech and language therapists support people of all ages who have communication and/or swallowing difficulties. This session will introduce your students to the fundamental principles in speech and language therapy, including many of the techniques used on a daily basis and the variety of disabilities that might be encountered.

Session dates are negotiable. For further information or to book, please get in touch via www.bcu.ac.uk/schools-and-colleges
